

Happy New Year!

January 2015 Newsletter

Hi Everyone,

Hope you had a fantastic holiday season and you're ready to make 2015 a positive and memorable year! Winter is here with snow and cold but the market seems to be picking up and buyers are still out looking. 2015 is looking to be good for real estate!

The market is definitely heating up or at least that's feeling I am getting right now. I generally expect January to be a bit slow but my phone is ringing and we're still selling homes even though temps have been cooler. We have only had a little bit of snow this year and winter has been mild so far other than the past 2 weeks. I expect 2015 to be better than I expected but you will want to keep an eye on the stock market and current events going on in the world. There is some pessimism out there about the stock market right now and other countries are struggling. We're talking about Russia, most of Europe, Japan is in a recession, and China is slowing down. Watch headline news about these countries and events to see how our economy fares if anything big happens in those parts of the world.

Sellers – If you are looking to sell in 2015 now is the time to get your game plan set and working on getting your home on the market. Since things seem to be heating up a bit early this year it would be safe to say it won't be a bad thing to list a little earlier so you have less competition. The stock market is very volatile right now and it may be in your best interest to sell earlier than later in the spring. Big homes with price tags higher than 400-450k+ can probably wait till the end of March or beginning of April since that is generally when buyers are looking in the higher price ranges. I don't have a crystal ball but I am suggesting most to sell earlier in the spring market if you can, especially if you are purchasing a bigger home after selling. You will have less competition, and can take advantage of very good interest rates. Since FHA dropped their mortgage insurance premium from 1.35% to .85% this should have a positive effect bringing in more buyers to the spring market this year. If you are just selling and not buying another property I would say wait till April. At that time we should see what kind of rise to expect in this year's prices. I see 2015 to be a very good year to sell if you are in the market to make a move.

Buyers – Interest rates have been very favorable and if you are an FHA homebuyer Mortgage Insurance Premiums have just been reduced from 1.35% to .85%. This could be a very considerable savings to you or a loved one. If you are buying FHA they are not giving case numbers for the new .85% interest rate until January 26th so do not get a case number yet, you will want to hold off until January 26th. If your lender has not told

you this they are not doing their job or looking out for your best interest. I just had a client cancel her FHA case number so she could get a new one on the 26th to take advantage of the savings. She is saving \$600 a year on the MIP (mortgage insurance) and if she were to take 30 years to pay off the mortgage it will save her \$18,000. Yes, the numbers may look small at first but the overall savings can be very big. This is not even on a big home but a smaller townhome. If you're a buyer – get off the fence now and take advantage before prices climb this year!

Family – Santa Claus has come and gone, the Christmas tree is down and things are getting back to normal. The hectic holiday schedule is done and this guy and his wife are happy to have things turn back to normal. We love the holidays but it sure is a lot of work! ☺ The girls were happy with what Santa brought and loved spending the holidays with family and friends. Below is a picture of the family. Mike could not make it up in time this year for pictures but said he will make it a point to get back so we can get another one with him in it. The picture was taken at the St. Paul Depot if you were wondering.

Market Statistics – The 2014 Annual Housing Report for the Twin Cities is in and included in this month's newsletter. If you would like to see the numbers for last year just read the report and see how your home fared compared to other cities. 2014 did not see the gains we saw in 2013 but we did not go backward but levelled out. It makes it look like 2015 should be much better but we'll see what another year brings. Check out the report and see the official numbers.

Some things to think about and do in January around the Twin Cities:

The Selling and Buying season are picking up and should be in full bloom by mid-March to early April. If you can get started early it will be in your best interest. Whether you are just getting ready and prepared for selling or buying in the spring or if you are looking to do something right away, now is the time to start planning and getting an action plan put together. I am always happy to help and answer any questions you may have or if you have anyone you know that needs help please feel free to give them my contact information. My goal is always to make you look good by referring me!

Hope you have a wonderful start to 2015 and look forward to talking to you this year! ☺

p.s. – it's time to change your dirty air filter and add salt to your water softener

Two steps forward, one step back. That's how the 2014 housing recovery went in most local U.S. markets. It was another recovery year but not without its hurdles – some new, some familiar. Metrics like sales price and new listings showed improvement, while new home construction and inventory didn't quite meet expectations. Though the rate of improvement is uneven across areas, price tiers and market segments, overwhelmingly encouraging data sets a positive tone for 2015.

While that data confirms that recovery is still underway, it also suggests that the 2014 recovery was not as strong as in 2013. Moderate inventory gains meant less robust – yet still mostly positive – price growth. Since prices have risen, the affordability picture isn't what it was in 2012 or 2013, though affordability remains above its long-term average. Factors such as inadequate mortgage liquidity, stagnant wage growth and student loan debt have served as impediments to both first-time and move-up buyers.

Sales Interest rates remained lower than most expected. That helped fuel buyer activity. In general, sales continue to skew away from the distressed segments and toward traditional sales. Overall pending sales increased 6.1 percent to 49,610 for the year. In 2015, watch for stronger seller activity to increase inventory levels, which could alleviate shortages in certain areas and segments.

Listings Those shopping for homes saw their searches return fewer homes but listings of higher quality. With 11,822 active listings as of the end of 2014, consumers had 7.2 percent fewer options in 2014 than in 2013. Persistent price gains meant once-underwater sellers could finally list their homes, but it would be good to see more sellers finding the extra confidence to sell. Seller activity increased 2.3 percent to 73,768 new listings. Expect that to continue in 2015.

Distressed Properties In almost every community, foreclosure and short sale activity is declining and is near multi-year lows. That's a good thing, since these distressed product types sell at a steep discount to their traditional counterparts. In 2014, the percentage of closed sales that were either foreclosure or short sale fell 41.8 percent to 16.5 percent.

Property Types With boomers emptying their suburban nests and millennials having their own unique set of preferences, market activity can often vary by property type, but the prevailing trend in median sales prices for both single-family homes and condos-townhouses was up – finishing 2014 with increases of 6.6 percent and 8.2 percent, respectively.

Prices Prices in most areas have enjoyed another year of gains. The overall median sales price rose 7.2 percent to \$205,739 for the year. Home prices should continue to rise in 2015 but perhaps at a tempered pace as the market approaches a natural balancing point. Price gains should be more in line with historical norms in 2015.

If the economic tailwinds stick around as they should, housing will get a boost in 2015. Qualified first-time buyers need good jobs and access to mortgage capital. Watch for movement on housing finance reform. Rates should be stable until mid-2015, when the Federal Reserve is expected to raise the key federal funds rate.

By almost all measures, the economic landscape has improved. Recent gross domestic product growth is rising at a 5.0 percent annual rate. The national unemployment rate is under 6.0, down from a 10-year high of 10.0 in October 2009, and stocks are reaching all time highs. The deficit is down by two-thirds, gas prices are at multi-year lows and we're in the midst of the largest stretch of job gains on record. Given all that, 2015 should hold much promise. Here's to making the most of it.
